

KEE GUARD®

Engineered Guardrails for Rooftop Edge Protection Innovative Adjustment

ABOUT KEE GUARD®

Kee Guard® is a free-standing guardrail system that protects workers at height without compromising the roof surface. Ideal for flat and low-slope rooftops, Kee Guard delivers reliable fall protection across a variety of roof types.

Using counterweight engineering and cantilevered design, Kee Guard forms a stable barrier that meets OSHA standards. Its modular layout ensures flexibility, durability and easy integration with standard rooftop safety systems.

WHY CHOOSE KEY GUARD®?

- Non-penetrating design preserves roofing integrity and prevents leaks
- Installs quickly with a torque wrench or hex key — no welding or threading
- Requires no special training and automatically safeguards all rooftop personnel
- Easily adapts to obstacles, radius edges and complex roof layouts
- Angled railing profile maintains a clean roofline with minimal visual impact from ground level
